## Relaxsan

Hypoallergenic, antibacterial and highly breathable – the innovative bamboo fabric cover of the new exclusive mattress Magnificent Bamboo collection contains natural antibacterial elements, and the bamboo fibre can absorb moisture, as well as being non-toxic and biodegradable. Softer than cotton, with a texture similar to a blend of cashmere and silk, the bamboo helps keep skin fresh. Magnificent Bamboo forms part of the Premium collection, and, with a height of 26cm, is higher than ordinary mattresses.
